Additional Secretary & Mission Director (NHM)

Dear Ma'am / Sir,

Sickle cell anaemia, haemophilia, and rabies are serious health conditions. Sickle cell anaemia is characterised by sickle shape red blood cells, anaemia, and pain, while haemophilia causes impaired blood clotting. Rabies is a deadly viral infection. These conditions impose a financial and emotional burden on families, underscoring the need for counselling, early diagnosis, and availability of medicines for management and prevention.

2. To address the issue, NHM Essential Drugs List is revised to ensure the availability of sickle cell anaemia drug (hydroxyurea), anti-rabies serum, anti-haemophilia factor VII, VIII, IX and APCC (Activated Prothrombin Complex Concentrates) inhibitor at health care facilities. The number of medicines before revision, new proposed additions, and number of medicines after revision are as follows:

3. All the States/UTs are requested to ensure that Hydroxyurea & Anti Rabies Serum are available at AAM – Sub Centre and AAM– PHC& UPHC. Additionally, availability of Factor VII, VIII, IX, and APCC at SDH and DH is to be ensured as per need and number of patients.
4. Under the NHM, financial support will be provided for the procurement of Hydroxyurea, Anti-Rabies Serum, Factor VII, VIII, IX and APCC to reduce the out-of-pocket expenditure born by sickle cell anaemia, rabies, and haemophilia patients. States are requested to rationally propose their budget for factors & APCC and monitor the quantities closely.
5. States are also advised to propose budget for Factor VII, VIII, IX & APCC under the Blood cell FMRs as previously proposed.
6. Revised EDLs (AAM – SHC, AAM- PHC, SDH and DH) is enclosed herewith.
